## Work Experience

---

**AmazonE (Amazon Clone)** React | tailwind | styled-components | Axios | Formik | Context API  
react-router-dom | suspense

- Developed a responsive web application inspired by Amazon.
- Ensured compatibility with B2B CMS web page design to meet industry standards.
- Implemented user registration, login, and profile management functionality to provide a personalized experience.
- Enabled seamless shopping experiences with cart functionality, allowing users to add products and make payments.
- Created detailed product pages with comprehensive information, including images and related products.
- Implemented search filter functionality.
- Utilized React and a range of libraries such as Axios and Formik to ensure efficient development.
- Leveraged state management using Context API for effective data management.
- Employed fake payment functionality for a simulated purchasing experience.
- Collaborated with the back-end team to integrate server-side functionality, enhancing the e-commerce platform's performance and user experience, while gaining insights into back-end development.

**Real Estate Website** [HOSTING](#) | [GIT](#) React | tailwind | styled-components | react-router-dom | Sign-in

- Seamlessly integrated React, Tailwind CSS and React Router DOM to create an efficient and visually appealing platform.
- The website is fully responsive with Sign-in (As user with a password 123).
- Created informative property listings featuring high-resolution images that draw inspiration from industry-leading design practices.

**Upwork** | Part-time | Jun 2023 - present

- Created custom content for clients.
- Mainly working on website markups using HTML CSS and JS.
